We have to take good care of each other

Dear customers and business partners

We have during the last weeks followed the unfortunate development of the Corona Virus (Covid-19). We have currently been proactive in order to take the necessary responsibility towards the Society and as responsible owners of our two sites in Denmark and Poland. Latest we have enhanced our initiatives since 0800 hrs. (Danish time) yesterday hence KSM no longer allows external visits from customers, suppliers, and other partners as such.

So far the initiatives has had the intended effect: No KSM employees has been infected by the virus. **KSM is operative with full manning in both sites and the production is running flat out with no reduction in capacity.** All mails will be replied to and the phones are open as usual. Some employees will be working from home but the service towards our customers will remain second to none.

We will continue to protect our customers business – meaning all initiatives needed to make sure our customers orders will be finalized as confirmed. Our suppliers will continue to deliver raw materials as normal. Inbound and outbound freight will continue. There has been established extraordinary precautions in the warehouse in order to prevent any risk of infection.

We hope for all of our Businesses that we and our employees and customers will manage to get through the coming period in good health. KSM will do our utmost to maintain that purpose.

Have a nice weekend!

Best regards

Jesper Vinther
CEO
